		-Technical, operational and other conditions in fast track approval with a focus on the similarities and differences between gTLDs & ccTLDS -A very small number of ccTLDs seem to have expressed expectation that they they will be consulted for any "application" for a GTLD in "their" language. Is this expectation broadly shared? Are these ccTLDs aware of and engaged in ICANNs processes (GNSO & ccNSO)? -How the ccNSO and the GNSO could communicate & work together more effectively & regularly
