Hi Jeff,

The org has published the first Community Status Update for the SubPro ODP. This is the first of three such updates planned during the ODP (see high level timeline on the SubPro ODP page). The update appears on the SubPro ODP page in the table titled 'Announcements, Blogs, Webinars, and More' as well as in the 'Work Products' found further down the page.

Please let us know if you have any questions or comments.
