Title:	EPDP - Internationalized Domain Names (EPDP_IDN)
Description & Scope:	On 20 May 2021, the GNSO Council passed a resolution to initiate the Expedited Policy Development Process (EPDP) on Internationalized Domain Names and adopt its charter. The EPDP Team is tasked with providing the GNSO Council with policy recommendations on: 1) the definition of gTLDs and the management of variant labels; and 2) how the IDN Implementation Guidelines, which Contracted Parties are required to comply with, should be updated in the future.

Status/Health Rationale:

- This project was initiated on 20 May 2021 and continues with a Status of "On-Schedule" and Health of "On-Target"

Current Activities:

- Conducting the first pass of substantive deliberations on Group 3 charter questions related to objection processes, string similarity review, string contention resolution, reserved strings, and other policies and procedures, as impacted by variant labels.
- Seeking input from Chinese, Japanese, and Korean Generation Panels regarding charter question A7 – the mechanism or criteria for identifying allowable characters for single-character TLDs in Han script.
- Seeking input from eligible Arabic and Chinese TLD registry operators regarding their potential interest in activating allocatable variants of their TLDs.

Planned Activities:

- Complete the first pass of substantive deliberations on Group 3 related to the objection processes, string similarity review, string contention resolution, reserved strings, and other policies and procedures, as impacted by variant labels.
- Conduct strawman analysis to understand which aspects of the New gTLD Program will be impacted due to the implementation of variants.
- Begin initial deliberations on Group 4 charter questions related to the "same entity" principle at the second-level.

Open Issues, Risks & Mitigation Plan:

- The EPDP-Team changed the sequencing of tackling charter questions to ensure that a logical order is being followed and provide efficiencies to deliberations. Deliberations of certain Charter questions also depend on the critical input from external parties, such as the Chinese/Japanese/Korean Generation Panels as well as Arabic and Chinese gTLD registry operators. Leadership intends to revisit the project plan to assess whether the original planning assumptions were reasonable, while factoring in the time needed for seeking external input. Council will be informed if any changes to the timing of milestones are considered necessary.
- At the time the Charter was developed, it was assumed that the SubPro recommendations, particularly those relating to IDNs under Topic 25, would have been approved by the ICANN Board. The IDN EPDP is conducting its work with the expectation that the SubPro recommendations will be approved by the Board at some future date. However, it has been necessary for the EPDP Team to make assumptions about the implementation of those recommendations in order to address the Charter questions. While these assumptions are believed to be sound, the Council should be aware of the possible ripple effect or potential risk to the EPDP Teamwork in the event that the Board does not adopt the related SubPro recommendations.

Completed in prior period(s):

- Completed the first pass of substantive deliberations on Group 1 charter questions related to the definition of all gTLDs using the Root Zone Label Generation Rules (RZ-LGR) ; reviewed draft outcome language developed for seven out of ten questions.
- Completed the first pass of deliberations of seven out of nine charter questions in Group 2 related to the "same entity" principle at the top-level.
- Received an update on ccPDP4's deliberation on ccTLD variant definition and management.
- Completed and distributed Project Package for April.
